Tailored to a Woman’s Needs
We know that the issues women in recovery face are different from those of men. Resolve Recovery focuses on these unique issues by offering gender-responsive treatment that is based specifically on research and knowledge of a woman’s unique strengths, emotional and physical development, and any associated risk factors that may play a role in her recovery.

Our treatment philosophy is rooted in proven, evidence-based practices and focuses on treating the whole person – body, mind and spirit – to ensure complete and permanent recovery. Our foremost goal is to help you or your loved one attain and maintain both physical and emotional sobriety.

Our treatment team works one-on-one with our clients to create a highly customized treatment plan that addresses and supports all of a woman’s needs.

Affordable Rates
Finding the right treatment program at a reasonable cost can be a challenge. Many facilities do not provide the spectrum of services that can mean the difference between a woman’s recovery and relapse. Still others position themselves more as luxury vacation getaways – not places where life-changing work needs to happen – and they can charge a small fortune.

Recovery shouldn’t cost you and your family everything. Resolve Recovery is a welcome, affordable alternative that provides the highest level of client-centered treatment at a fraction of the cost of many other facilities. We work closely with each client and her family to offer a variety of treatment options, whether through insurance or affordable private-pay options.

We accept most HMO and PPO insurance plans. For those without insurance, we offer pricing plans and payment options, and we can help in providing financial assistance.
